CATÁLOGO DE COLORES

The vinyl fabrics (synthetic leather fabrics) used to cover our equipment combine beauty, comfort and durability. Empower has 49 colors, distributed in 5 amazing textures, thus allowing your equipment to be custom-made to your preferences.

Please bear in mind that many colors may have a slight difference when viewed in monitors, notebooks and cell phones due to distinct calibrations of each equipment. This may generate variations in color perceptions and therefore, we cannot guarantee that what you see accurately portrays the actual color.

This catalog features the fabric texture and brightness scale (at the top of each page), the solid colors names, the Pantone color codes and reference numbers.

We strictly follow the standardized worldwide Pantone color code. For further assistance as to the Pantone color code, please go to <https://www.pantone.com/color-finder> or anywhere you will be able to physically check and better understand the color tones before placing your order. Due to the texture brightness of the fabric, it may cause a small variation on the color ton and present an almost imperceptible difference in the end product. If you want us to sent you samples, please contact us.

Below follows the **brightness** scale:

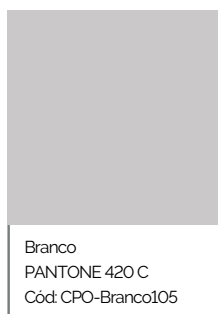

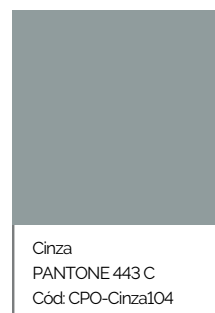

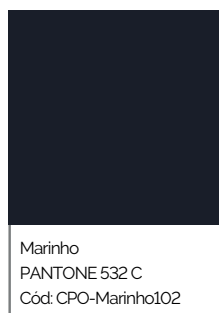

If you wish for other fabrics and/or fabric colors than the ones presented in our catalog, contact us and we will assist you.
